

Amendments to the Specification:

Please replace the paragraph beginning at page 4, line 4, with the following rewritten paragraph:

-- A further concept to adaptively reduce a bandwidth requirement of a data stream is proposed in reference S. Kang and A Zakhor, "Packet scheduling algorithm for wireless video streaming" in Proc. Of the 12th Packet Video Workshop 2002, Pittsburgh ~~Pittsburg~~, PA, April 2002. In this concept the dependencies between individual frames constituting the data stream are taken into account, and, frames depending on a reference frame, which was not transmitted, are dropped. --
